

Elevator Pitch for IRIS Carbon POC at ENI Group

"Hi I'm Abtsega Tesfaye, thank you for taking the time to meet with me today. I'm excited to share how IRIS Carbon can revolutionize ENI Group's regulatory reporting process."

ENI Group currently faces significant challenges with its complex and evolving regulatory reporting requirements. The manual effort involved is time-consuming, prone to errors, and costly, which impacts overall efficiency and compliance accuracy.

IRIS Carbon is a leading SaaS platform designed to streamline financial and non-financial reporting. It supports XBRL and iXBRL reporting, ensuring compliance with mandates like ESEF, SEC, and ESG. Our platform offers a user-friendly interface, robust support, and advanced validation tools to create accurate, high-quality reports. By integrating IRIS Carbon, ENI Group can significantly reduce the time and effort spent on compliance reporting, minimize errors, and cut costs.

With IRIS Carbon, ENI Group can achieve up to 30% reduction in reporting time, 99% accuracy in generated reports, and a 20% decrease in compliance costs. Additionally, our platform's flexibility and future-proof design ensure long-term compliance with evolving regulatory standards.

I propose starting with a customized training session for your team, followed by a pilot program using real data. This approach will allow you to experience the platform's benefits firsthand. Can we schedule a demo next week to show you how IRIS Carbon can transform your reporting processes?

Thank you for considering this opportunity. I'm confident that IRIS Carbon will provide the efficiency and accuracy ENI Group needs for its regulatory reporting. Let's take the next step towards simplifying your compliance journey.
